1 Introduction

sis is a text

1.1 Licensing

Was ist licensing und warum? allgemein

1.2 Motivation

enthält als Abschluss SCOPE

1.3 Related Work

related work

2 Foundation

sis is a text

2.1 Android

sis is text

2.1.1 History

sis is text

2.1.2 Basics of Android

sis is text

2.1.3 Evolution of the Android Compiler

sis is text

Java Virtual Machine

sis is text

Dalvik Virtual Machine

sis is text

Android Runtime

im Moment abwärtskompatibilität dex in oat (tools zum extrahieren nennen)

2.1.4 Root on Android

what is it? how is it achieved? what can i do with it? (good/bad sides)

2.2 License Verification Libraries

What is a lvi? why are they used? connection to store

2.2.1 Amazon

Amazon DRM

Implementation

sis is text

Functional Principle

sis is text

Example

anhand eigener app

2.2.2 Google

License Verification Library

Implementation

sis is text

Functional Principle

sis is text

Example

anhand eigener app

2.2.3 Samsung

Zirconium

Implementation

sis is text

Functional Principle

sis is text

Example

anhand eigener app

2.3 Reengineering Tools

main tools

2.3.1 Dex

mein custom script erklären

2.3.2 baksmali

<https://github.com/JesusFreke/smali>

2.3.3 Java

Androguard

<https://github.com/androguard/androguard>

jadx

<https://github.com/skylot/jadx>

2.3.4 Diff

<https://wiki.ubuntuusers.de/diff>

-N: Treat absent files as empty; Allows the patch create and remove files.

-a: Treat all files as text; Allows the patch update non-text (aka: binary) files.

-u: Set the default 3 lines of unified context; This generates useful time stamps and context.

-r: Recursively compare any subdirectories found; Allows the patch to update subdirectories.

script erklären

3 Cracking Android Applications with LuckyPatcher

<http://lucky-patcher.netbew.com/>

3.1 What is LuckyPatcher and what is it used for?

wer hat ihn geschrieben?
auf welcher version basiere ich
su nicht vergessen
was kann er alles
was schauen wir uns an?

3.2 Operation

wo arbeitet er?
warum dex und nicht odex anschauen?
patterns und patching modes grob erklären (modi von luckypatcher die verschiedene operationen (pattern) auf app anwenden) => vorgehensweise zur

3.3 What patterns are there and what do they do?

was greift jedes pattern an? wie wird der mechanismus ausgeklingt? was ist das result?

3.4 What are Patching Modes are there and what do they do?

kombination von patterns.
welche modes gibt es? welche patterns benutzen sie?
welche apps getestet und welche results?

3.5 Learnings from LuckyPatcher

was fällt damit weg?

erklären warum (2) 5.1.2 Opaque predicates zb nicht geht, da auf dex ebene einfach austauschbar

simple obfuscation for strings? x -> string (damit name egal)

4 Counter Measurements for Developers

am besten mit example

4.1 General and Tampering Resistance

siehe masterarbeit 2

4.1.1 Root Detection

<http://stackoverflow.com/questions/10585961/way-to-protect-from-lucky-patcher-play-licensing>

4.1.2 LuckyPatcher Detection

<http://stackoverflow.com/questions/13445598/lucky-patcher-how-can-i-protect-from-it>

4.1.3 Sideload Detection

<http://stackoverflow.com/questions/10809438/how-to-know-an-application-is-installed-from-google-play-or-side->

4.1.4 Signature Check

once in code

once in native c code?

4.1.5 Remote Verification and Code nachladen

certificate an server, get signature and send to server

content direkt von server laden (e.g. all descriptions, not sure if dex possible)

4.2 LVL Modifications

siehe masterarbeit 2

4.2.1 Modify the Library

google

4.2.2 Junkbyte Injection

master1

4.2.3 Checken ob ganzer code abläuft und dann nacheinander elemente aktivieren

master1 - testen

damit die ganzen blöcke durchlaufen werden müssen

4.2.4 Obfuscation

master1

4.2.5 Hidden Classes

master1

4.2.6 dynamische Codegeneration

4.3 Software Aided Methods

sis is text

4.3.1 Dexguard

master2

4.3.2 Dexprotector

master2

4.4 External Improvements

sis is text

4.4.1 ART

art hat masschinen coed
wenn reengineerbar dann nicht gut

4.4.2 Secure Elements

5 Conclusion

sis is a text

5.1 Summary

sis is text

5.2 Discussion

sis is text

5.3 Future Work

art?

Glossary

computer is a machine that. . .

Acronyms

TUM Technische Universität München.
